## 9:11 Cheikh Ould Baya shrink Russian

The Mauritanian government (actually the former colonel **Cheikh Ould Baya** ) after showing his muscles still retracts once before this time the Russian shipowners. The real boss of the Ministry of Fisheries as though officially it is a technical adviser, called the Russian owners, offering to sign a new agreement. conditions: Russian align that pays a European shipowner namely 123 € per tonne caught in excess of \$ 100,000 per quarter and so overall the boat access back to the Russian meadows just € 130 per tonne fished instead of 329 € originally requested. Russian delegation is expected to **Nouakchott** to initial agreement on Monday or Tuesday. We do not yet know if there are other payments, but it would surprise anyone.

Again, **Cheikh Ould Baya** after long procrastinated and lost to **Mauritani** e millions of dollars, and come back to the initial position. I must say that on the front of the agreement with the **European Union** "*that hold still*". Only about eight boats have deigned to fish in Mauritanian waters with the conditions imposed by **Cheikh Ould Baya** . It is a shortfall important to our economy, but who cares?
